Get-together at the beach bar Strandpauli

ABOUT

The two-day conference will cover a wide range of issues related to the current status of deploying and implementing the pan-European eCall. It is designed for stakeholders from the European Commission, politics and industry who are interested in receiving first-hand information about future challenges for eCall services, and in exchanging different perspectives. The international conference will also include topics such as eCall for HGV, Dangerous Goods, Long Distance Coaches and Powered two wheeled vehicles. In addition to the scheduled talks, there will be an exhibition and opportunities for networking.
